202 A Congress Street,
Portland, Maine

Job 989 - re Elevators.

Gentlemen:

As requested, we have made a thorough examination of the construction of the elevator shaft in the building at 202 A Congress Street to determine whether the installation of a new elevator car of larger capacity will necessitate any alterations in the construction.

The elevator shaft is about 5'-8" x 5'-10" inside and extends from the basement to the roof. Construction consists of 4" x 4" yellow pine corner posts with 2" x 4" yellow pine studs spaced about 12" on centers on each side.

The elevator machine is in the basement so that the only overhead work is the main and counterweight sheaves. The main sheave is carried on two 9" x 21.8# I-beams placed diagonally in the shaft; the counterweight sheave is carried on two 8" x 16.4# I-beams placed parallel with the rear wall, one end being supported on the elevator shaft wall and the other end being supported by 3" diameter pipe columns on the 3" D's. This arrangement places the bulk of the load on the southeast corner of the elevator shaft and within 6" on either side of the corner post. The main elevator beams are about 5' above the roof level and rest directly upon 4" x 8" yellow pine plates carried by the studs and corner posts. The studs and corner posts extend through to the basement with the equivalent of 4" x 8" headers all round at each floor. There are also 4" x 8" headers over the elevator door openings in each story. The elevator shaft is very well constructed and lined throughout with heavy gauge galvanized iron.

The new car proposed will have an area of approximately 20 square feet, and, allowing 2 square feet for each passenger, would have a capacity of 10 passengers. Allowing 150 pounds per passenger, the live load would equal 1500 pounds, or 75 pounds per square foot of car floor. The estimated weight of the car and counterweight is 3500 pounds, making a total load of 5000 pounds. Adding 100% for impact, the load becomes 10,000 pounds. Distributing this load at the proper points on the I-beams, the maximum load will be at the southeast corner of the shaft, producing stresses well within those allowed in the usual practice for this type of construction.

David Edwards & Sons Inc. - page 2

November 14, 1939.

In our opinion the structure as it now exists is ample to carry the new elevator car with increased capacity in a safe and substantial manner. Therefore we do not recommend making any changes in the present construction.

Calculations used in arriving at the above conclusions are on file at our office and they will be submitted upon request.

Very truly yours,

WEBSTER & LEECH, INC.

Walter H. Webster
By Walter H. Webster, President.

H.

STATEMENT OF ELEVATOR TESTS

PORTLAND, MAINE,

March 12-1940

I, Irvin L. A. Williams, have personally supervised the
as an employee of Oliver Elevator Co, hatchways and enclosures at 605 A Congress St. as permitted
under Building Permit 39/2167, and have personally supervised tests of loading capacity and of all brakes, inter-
locking and all other safety devices, and I do here state that, according to my best knowledge and belief, the elevator will
safely carry the maximum rated loading and all brakes, interlocking and other safety devices are in satisfactory condition.

73 MAIN STREET
SOUTH PORTLAND
MAINE

May 4, 1938

City Council
Portland, Maine

Gentlemen:

We are advised by the Inspector of Buildings in his letter of May 3rd that the Board of Municipal Officers voted to disapprove our application for a permit to cover the erection of one roof sign on the building of 602-604 Congress Street.

While we regret this action has been found necessary, we hope that at some future date the board may find it possible to reconsider their decision regarding this particular location, as it lies in a purely commercial section of the city between two neonized bulletins we now operate, showing to traffic in the opposite direction.

We feel very definitely that if this location is to be considered in the future for an advertising sign, our application originally filed on March 31st merits prior rights. We will reapply formally for a permit to build this location if you feel this action necessary to receive prior consideration.

Thanking you for your past courtesies, we are

Very truly yours,

JOHN DONNELLY & SONS

Rept. 1543C-I

Disapproved 5/2/38 by Board of
Municipal Officers

May 3, 1938

John Donnelly & Sons,
73 Main Street,
South Portland, Maine

Gentlemen:

- On May 2, 1938 the Board of Municipal Officers voted to disapprove your application for a permit to cover erection of one roof sign on the building at 602-604 Congress Street.

Under these circumstances I am unable to issue the permit, and if you will return the receipt for the fee paid to this office at least by May 13, 1938, your money will be refunded by voucher.

Very truly yours,

W McD/H

File: Rept. 8617B-I

March 16, 1937

John Donnelly & Sons,
78 Main Street
Portland, Maine

Gentlemen:

On March 15, 1937 the Municipal Officers voted to approve your application for a building permit to cover alterations and enlargement of the sign on the roof of the building at 604 Congress Street.

Upon attempting to check the framing of the existing roof on the premises as shown in your design drawing, I could not discover where this existing framing could be seen. I assume that you or your designer had found some place to observe the details of this roof framing. At any rate the permit is issued depending upon the existing framing as shown. If you are not sure that this existing framing is correct, it would be well for you to make sure it is not helpful to anyone to find a situation such as was developed with relation to others of your signs on one roof on Congress Street.

The permit is enclosed herewith.

Very truly yours,

McD/1

Inspector of Buildings

To The Municipal Officers:

Having examined an application by John Connolly & Sons for a permit to cover substantial alterations of certain roof sign on the building at 604 Congress Street, the Committee on Zoning and Building Ordinance appears recommends that the application be approved and that the Inspector of Buildings, by acceptance of this report and its recommendations, be directed to issue said building permit, subject to full compliance with all terms of the Building Code.

COMMITTED ON ZONING AND BUILDING
ORDINANCE AFFAIRS

March 8, 1937

John Donnelly & Sons,
75 Main Street,
South Portland, Maine

Gentlemen:

Your application for a permit to cover an addition to the roof sign on the building at 634 Congress Street requires approval by a majority vote of the Municipal Officers before it may be issued, since the recent amendment to the Building Code provides: "No permit shall be granted to cover the erection of or the substantial alteration of, as regards location or otherwise, any attached or detached sign or billboard.....until such permit shall have been approved by a majority vote of the Municipal Officers."

Your application will be presented to the Committee on Zoning and Building Ordinance Appeals at a hearing at the City Council Chamber, Friday, March 12, 1937 at 11:00 o'clock in the forenoon.

Very truly yours,

Inspector of buildings

#5280A-I

July 3, 1931

Wilbur F. Blake, Inc.
9 Forest Street
Portland, Maine

Gentlemen:

Enclosed is the building permit covering installation of gas fired hot water heater for Mrs. Florence C. Clark at 602-A Congress Street (Rt # 203.) You will recall that we talked about venting this heater over the telephone.

The Building Code does not require venting of a heater in a case such as this. If the heater had a pilot light it was one of the type known as instantaneous, a vent would be required.

If a vent is provided for the gas stove, it must go through the roof, and may be made of wrought iron or cast iron pipe as long as the pipe is not directly against any woodwork or combustible material.

I talked with Mrs. Clark and explained to her the danger of running this gas heater with the windows all closed in the room, and she understands and agrees that she will see to it that the transom overhead is always open when the gas heater is in operation.

Very truly yours,

Inspector of Buildings.
