To: "Mark Alexander" <markalex@eclipse-nrg.com>

Good Morning Mr. Alexander,

It was good talking with you, this morning, about dishwasher leasing. Regarding a grease interceptor, for Piao Shang Sichuan Kitchen, it will have to be a thousand (1000) gallon grease interceptor, or equivalent. It could be installed outside, or it could be installed inside, in the basement, of the restaurant. Attached, please find examples of a thousand gallon, or equivalent, grease interceptor, acceptable to the Department of Public Services, namely: details of *Fig. II-19*, a precast concrete structure; *GB-250*, a polyethylene structure; *GMC 1000 [UPC]*, a fiberglass structure; *Endura XL 100*, a plastic structure; and, *Big Max 1150 G*, another polyethylene structure. For more on the City's Fats, Oil, and Grease Program, Goggle: "Fats, Oil, and Grease Program, Portland, Maine."

Thank you,

Frank Brancely,
Senior Engineering Technician,
Department of Public Services,
55 Portland Street,
Portland, Maine 04101-2991
