Re: Commercial Interior Construction & Change of Use Application
132 Spring Street (1st Floor)

Marge:

I am submitting an 'All Purpose Building Permit Application' for the above referenced property. As you may recall from our recent phone conversations, we are intending to change the use of the ~~1st~~ portion of this building (labeled on drawing No 04-1500-10) to a commercially zoned unit ~~as~~. Currently, the building is zoned in the following manner...

First Floor: Approximately 706 square-feet commercially zoned & 689 square-feet residentially zoned. The commercial space is located along Spring Street, and there is a one bedroom / one bath apartment in the rear of the building which abuts the church. The apartment is to be removed and turned into a 'Class A' commercial space.

Second: There is a three bedroom / two bath apartment, which occupies the entire second floor with the exception of the common vertical stairways. This apartment is approximately 1,680 square feet, and also has a deck overlooking Park Street, which is approximately 315 square feet. Your office has already approved this and a C.O. was given around February 15, 2004.

Third: The third floor has a one bedroom / one bath apartment that is approximately 610 square feet and in addition has a 225 square foot deck that also looks down towards the Eastern Prom.

My largest question/concern with this project became the lack of an existing sprinkler system in the building, and I therefore met with Lt. Gaylen McDougall on January 27, 2004.

He determined that the building was not in need of a sprinkler system and then verified his conclusion with Michael Nugent. I spoke with Mr. Nugent following my meeting with Lt. McDougall to confirm the thoughts of Mr. McDougall and this was agreed upon by both parties.

39-7D-1.5

We have demolished the first floor in order to determine what walls were bearing and so that myself and our architect could design the first floor space. We are intending to open our Real Estate office in this space, and I have enclosed plans depicting what we intend to do. I have drawn these plans myself as I am a Naval Architect and Engineer and so can explain any uncertainties that you may have.

Jim White of White Homes, 2 Farwell Court, Westbrook, Maine is the general contractor and he can be contacted at his phone # 741-1141. I spoke with him this morning, and he will be glad to come visit your office if needed.

I will be supplying you with electrical & plumbing plans when they are completed. Most likely, before the end of next week. I would however appreciate getting the construction portion of the project approved by the City of Portland so that we can begin. In the meantime, we will be stocking the project. As mentioned in the application, we hope that the project will cost us about thirty-two thousand dollars.

I met with Deb Andrews at the building about a month ago and discussed what our limits were as we are in a historic building. We have gone through great pains; both in the design process and the sacrifices in the space in order to "not touch" the building envelope in any manner. Everything with regards to the exterior will remain the same, with the exception of paint, which will be fully restored in the following months. This painting project alone will take about six weeks as we intend to make this building the jewel of the neighborhood.

I very much appreciate your time and effort.

Thank you for all your help.

Regards,

Christian Townsend
