Subject: Permit #2531 - 133 Spring St

Hi Cecile,

I am in the process of reviewing your permit application for a seasonal enclosure at the above-referenced address. I wanted to contact you to let you know that the enclosure would not meet the City's interpretation of a "temporary tent", and therefore this application cannot qualify for the Fast-Track process. We will try to complete the additional reviews as quickly as possible. The application will need to be reviewed for code compliance, so I am requesting that you or your builder provide some additional construction details so we may move forward. Specifically, we need a manufacturer's spec sheet on the clear polycarbonate plastic sheeting, and also details on how the framing will be secured/fastened in the doorway. This information can be e-mailed directly to me, please send attachments in PDF format.

Thank you for your help, and please let me know if you have any questions about what we are seeking.

Yours,
Chris
