Plot Plan of Two Car Metal
Garage For Carmelo Sachelie
161 York Street
Portland, Maine

AP 155-161 York Street-I

July 9, 1951

Mr. Carroll Beck
158 Westbrook Street
South Portland, Maine

Copy to: Mr. Camelo Sachalie
161 York Street

Dear Mr. Beck:

Building permit for moving of an existing two car retail front garage from the rear of 29 State Street to the lot at 155-161 York Street is issued herewith subject to the following:

1. Front wall of building in its new location is to be no closer than 18" to the line of York Street and the overhang of eaves on the side wall is to be no closer than 10' to the building of wood frame construction on the same property.
2. Overhead door hardware is to be provided for the large entrance doors to the building so that when opened or when being opened they will not project over the public sidewalk.
3. It is understood that all parts of the building which are in bad structural condition are to be replaced with new material and that the three foot addition proposed on the rear of the building is to be constructed of new material of similar construction to that in the existing building.

Very truly yours,

Warren McDonald
Inspector of Buildings

AJS/O
P. S. No burnable lining is permitted inside the walls of this garage and non-burnable lining on wood strapping. Permit is issued on basis that the building has none now, and that none is to be provided--this because the building is within Fire District No. 1.

STATEMENT ACCOMPANYING APPLICATION FOR BUILDING PERMIT

for Garage Date June 28, 1951
at 155-161 York Street

1. In whose name is the title of the property now recorded? Carmelo Sachelle
2. Are the boundaries of the property in the vicinity of the proposed work shown clearly on the ground, and how? building on adjoining lot owned by same
3. Is the outline of the proposed work now staked out upon the ground? yes
If not, will you notify the Inspection Office when the work is staked out and before any of the work is commenced? _____
4. What is to be maximum projection or overhang of eaves or drip? 6"
5. Do you assume full responsibility for the correctness of the location plan or statement of location filed with this application, and does it show the complete outline of the proposed work on the ground, including bay windows, porches and other projections? yes
6. Do you assume full responsibility for the correctness of all statements in the application concerning the sizes, design and use of the proposed building? yes
7. Do you understand that in case changes are proposed in the location of the work or in any of the details specified in the application that a revised plan and application must be submitted to this office before the changes are made? yes

File with copy

155-161 York Street-I

July 2, 1951

Mr. Carmelo Sachelle
161 York Street
Mr. Carroll L. Beck
158 Westbrook Street
South Portland, Maine

Gentlemen:

There are a number of questions involved in the locating of a metal frame garage on the lot at 155-161 York Street which need clarification before a building permit may be issued. The first of these is in regard to the location on the lot. Because of the property's being in Fire District No. 1, no part of the building may be located any closer than 10' to a building of wood frame construction or closer than 5' to a private lot line. An inspector from this department reports that the location as staked out on the ground does not comply with this requirement.

Under the Zoning Ordinance the front of the building may be located no closer to the street line than the front walls of any building used for habitation on an adjoining lot, but in no case may it be placed so that the entrance doors will swing over the public sidewalk. We understand that there is some question as to the location of the street line at this location. The Public Works Department will stake out the street line upon request but because of its being their busy season and due to lack of personnel there may be some delay in their being able to do so.

We also understand that an addition is planned on the rear of the building after it is moved to the new location, but there is no indication of it in the application for permit. The addition will need to be built of metal frame construction and details of such construction will need to be furnished before a permit is issued. It was also noticed that the lower part of the walls of the building in its present location is badly rusted and eaten away. What is to be done about this condition?

If you will notify us when the building has been restaked in such a location as to comply with requirements, we will check it again. It should be borne in mind that the clearance from a building of wood frame construction to the garage is to be measured to the overhang of eaves, not the wall, of the building.

Very truly yours,

Warren McDonald
Inspector of Buildings
