
9. EVIDENCE OF FINANCIAL & TECHNICAL CAPACITY

9.1 FINANCIAL CAPACITY

The project will be fully funded through a combination of funds:

- State Bond PL 2015 Chapter 478
- Multimodal Bond
- Federal FASTLANE Grant.

The fund secured for the Portland, New Maintenance building will be used for the design, construction and inspection services for the proposed project. Funds for this project will be administered through the MaineDOT

9.2 TECHNICAL CAPACITY

Winton Scott Architects is the architect for the project, Bennett Engineering is the engineering firm completing the electrical and mechanical engineering, Becker Structural Engineers are the structural engineers, and Haley & Aldrich are the geotechnical engineers for the project, and Woodard & Curran is the engineering firm completing the site design and permitting applications for the project. Each firm has significant experience completing similar projects in Maine, and specifically in Portland.

Resumes or additional company information for Woodard & Curran, other consultants referenced within this application, or key personnel involved in preparing this application can be provided upon request.
