

Casement Windows: A Refined Clean-Line Design

Alside Casement Windows are available in up to five units within a single mainframe (right).

The slimmest profile in the industry offers a better view from anywhere in your home.

One simple way to add drama to any room is by bringing in more natural light and a larger, more open view of the outdoors. That's exactly what Alside Casement Windows deliver. The slimline-designed frame is among the narrowest in the industry – maximizing the glass area for a generous infusion of beautiful daylight. Add to that, a narrow jamb which replicates that of a wood casement window for authentic handcrafted appeal. In addition to this elegant appearance, each Alside Casement Window features:

- A smooth, easy-to-operate heavy-duty positive crank mechanism that eliminates the need to strain and force windows open.
- Stainless steel hardware that provides years of trouble-free hinge operation.
- An energy-efficient custom design with double compression bulb seal to protect against air and water infiltration.
- Maintenance-free frame and sashes that make every window carefree . . . for life.
- Available in a continuous mainframe with multiple-lite configurations.
- A lifetime limited warranty** that covers your investment from top to bottom.
- Optional glass breakage warranty.

This contemporary office setting (right) is enhanced by an individual casement window featuring narrow brass grids.

A low-profile, single-lever locking handle adds to the ease of operation.

Functional and stylish, this sleek fold-away crank handle won't get caught up in blinds or curtains.

Sturdy stainless steel hinge system for years of trouble-free opening and closing.
