Building Inspector
City of Portland, Maine

RE: 57 Tyng Scope of Work

To Whom It May Concern:

I am applying for a permit to replace the current drop ceilings that are 2x4 acoustical tiles. The new ceiling will be 3/8 sheetrock attached to a new metal grid system to be installed by the drywall contractor. The area is about 600 sq. feet on the first floor. The rooms to be done, as depicted on the attached floor plan, are the living room, family room, and kitchen/dining area. There will be some light fixtures replaced and my electrician, Hannan electric, will meet the electrical inspector there to go over scope of work and then pull the appropriate permit.

Please let me know if you need anything further from me.

Regards
