Violation	Proposed Date of Completion
<p>NFPA 80- ANNEX D.4 1-HOUR FIRE DOORS ASSEMBLIES REQ; Listings are provided for floor fire door assemblies that are installed in fire-rated floor-ceiling or roof-ceiling assemblies that have been tested in accordance with the methods described in NFPA 288. The listing indicates the fire-rated assembly and the hourly rating (3 hours, 2 hours, 1.5 hours, 1 hour, .75 hours) for which the door can be permitted to be used so that access to the space above the ceiling or to the floor above can be provided without adversely affecting the fire resistance rating of the entire assembly. The listing provides limitations on the maximum size of an individual door opening and the total area of all door openings permitted for each 100 square feet of floor or ceiling.</p> <p>Apartment #1 and #3 are connected on the second floor by a non-fire rated door. No common areas exist. Neither apartment has a second means of egress, although we are unsure if one is needed or if it needs a fire door.. Windows are not egress rated. It will require follow-up from fire prevention to verify whether a fire door is needed, or if egress windows are required.</p>	<p>9/11/17</p>

Captain Petrucelli told me to send this in when I had secured a date for the work to be done, and then to email photos of door + hinges. My carpenter's wife is gravely ill, so he is unable to come until September but Capt. P said this would be okay.
