Re: Masonry Quote

Proposal Amount: \$10,800

Proposal Breakdown:

Item #1: Rebuild 2 existing chimneys	\$7,900.00
Item #2: Building Repair/ repoint work	
Item #3: West Elevation low wall repair	\$2,900.00

Scopes:

Item #1: Remove existing chimneys down to flashing level and rebuild to match

Item #2: Repoint cracking mortar joints in obvious locations at three elevations of the building. Also, apply cement wash to ledger/shelf brick at east elevation.

Item #3: Replace any damaged brick at base header/shelf at west elevation. Also, repoint all mortar joints in brick below the repaired header/shelf brick.

Notes:

1. Item #3 would include repairing the mortar joints in the granite/stone base to a depth of approximately 6 inches (accessing by pulling back crushed stone at base)

Sincerely,

Ed Low
