To: Glenn Harmon <gharmon@portlandmaine.gov>

Thanks, Glenn. Here is what I have...

Flame spread ratings of wood species: <http://awc.org/pdf/codes-standards/publications/dca/AWC-DCA1-FlameSpreadPerformance-1604.pdf>

Flame spread of Moso Bamboo for Ceiling/wall use (scroll down to 'fire safety, wall and ceiling) 18mm= 11/16"

thick: <https://www.moso.eu/en/bamboo/certifications>

Plyboo has confirmed a Class C rating for the prefinished flooring in this attached email dialogue. I will pursue getting the more formalized documentation if it helps:

Hi Chris

Yes I checked with the owner and he said the edge grain amber flooring is a class C for wall and ceiling application

Thank you and

Best Regards

Connie Manzano
