CC: sboilard@vtec.org

Stacie and Brad,
 Thanks for letting us know. I remember speaking about the renovations. With the dryer vent invisible from either Park Street or Spring Street, no additional review by the Historic Preservation Office is required.

Thanks,
 Rob Wiener

As per the conditional building permit
 We have studied the dry vent issue and have determined that we will need to install a dryer vent This vent will be to the back of the building and vent to the ally way. During the process of the original permit I spoke with the historical office and explained to them that if we vented we would be venting to the ally way I would be

happy to communicate with them again as may be required.

We request that this vent be added to the building permit.

Thank you,

Stacie Boilard, Director of Training and Education Programs

Here is your issued permit. Thank you.

NOTE: One set of printed approved construction documents shall be kept at the site of work and shall be open to inspection by building officials. (Section 107.3.1 of the Maine Uniform Building and Energy Code (MUBEC)).
