Existing Fire Escape Evaluation/Certification
24 Deering Street
Portland, ME

SI Inc. Job #15-0113

Mr. Chadbourne,

As requested I am writing this memo to follow up on the completion of recommended repairs on the fire escape at the above referenced site. The opinions expressed herein are based on visual observations during my visit to the site and my knowledge of structures, their components, and the related building codes. No calculations or physical testing were performed to determine the adequacy of the complete structural systems. Architectural/life safety conditions are not included in this report. No warranty expressed or implied, as to the condition of the building structure, is intended.

The corrections to fastening and railings appear to be in compliance with our recommendations, therefore I certify that the fire escape is in good condition and is structurally sound for use as an emergency exit.

Do not hesitate to call with any question, comments, or if I can be of further assistance.

Sincerely,

Aaron C. Jones, P.E., SECB
President
