

9/22/14

Scope of Work: 24 Deering St. Portland

Elldée Electric will be installing a new addressable fire alarm system for a 5 unit apartment building located on 24 Deering St. in Portland. The fire alarm panel will be located at the main entrance of the building. The panel will be monitored via a 24-hour central station of the owner's choice.

The building does not have a sprinkler system and therefore heat detectors will be installed in the apartments in all rooms larger than 55 square feet.

Norris Inc. will provide fire alarm equipment, submittal docs, fire alarm permits, final connections and testing per City of Portland requirements.
