March 28, 1940

Ballard Oil & Equip. Co.
353 Cumberland Avenue,
Portland, Maine

Gentlemen:

In connection with the ... burner installation for Mr. Fred B. Kelsey at 22 Deering Street, we find that an iron pipe feed line from tank to burner has been merely laid on top of the floor for a run of about ten feet.

Perhaps this was intended only as a temporary installation and we happened in during the temporary period. At any rate will you be kind enough to have this feed line permanently and securely fastened rigidly in place at least by April 9, 1940?

Very truly yours,

WJcD/H

Inspector of Buildings

CC: Fred B. Kelsey
22 Deering Street

Dear Mr. Kelsey:

In addition to the above our inspector noted that the smokepipe of the existing heater is only six or eight inches below a wooden lath and plaster ceiling above it. On account of the wooden laths this is considered too close for safety. Our inspector thought that the smoke-pipe could be lowered without inconvenience.

Will you be kind enough to either have it lowered so that the top of the smokepipe is 15 inches below the ceiling or provide a shield of rigid asbestos lumber or similar incombustible material at least three times the diameter of the smokepipe in width, extending the full length of the pipe where it is closer than 15 inches to the ceiling and suspended on non-burnable hangers such as wire about halfway between the top of the smokepipe and the ceiling at least by April 9, 1940?

Very truly yours,

Inspector of Buildings
