Hello Marieke,

Yes, the attached plans appear to be correct for the fire service main. 8" is sufficient for the fire pump service. I will be the designer for the project so if you have any additional questions let me know. Also do you have an ftp site to download AutoCAD drawings for this project?

Thank you.

**Subject:** 667 Congress St - Fire Service Code Confirmation

Good morning Bryan,

I am working with Bert on the 667 Congress St project and we are in the process of getting our foundation permit approved and we received a question from the Inspections Office regarding the incoming water supply for the fire pumps, please review the attached annotated utility plan and provided confirmation that the referenced code is met by

the fire/water service shown. We are hoping to keep the permit approval process moving forward so please respond as soon as possible.

Let me know if you have any questions,

Marieke
