Hello,

Here are the other documents for the hood exhaust permit application.

As for cooking equipment under the hood, we'll have 3 induction burners and one 30" convection oven. (As shown in the plan drawing from my hood contractor)

To note: our hood contractor installed Vinland's hood, so on the summary of work for Rossobianco they wrote "Vinland". It is not for Vinland, of course, and you can see that it's dated from a week ago. I wanted to mention that to clear up any confusion. They wrote Rossobianco and our address on the plan drawing, so they clearly know the difference between the two restaurants.

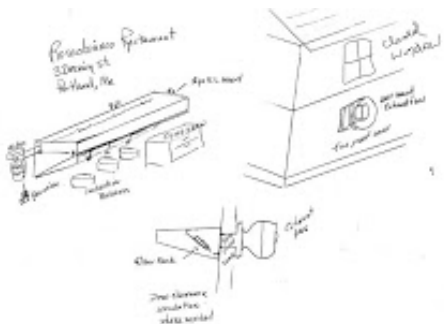

Please let me know if I can provide anything else to get the ball moving along. As for the fast track permit, I've attached it again, just to keep it all together. I'd like to thank you, David, for working with our request, despite the category of our installation.

Thank you and I hope that you had a nice Memorial Day Weekend!
