FIRST FLOOR CONVERSION FROM DENTIST OFFICE TO RESIDENTIAL APARTMENT

68 DEERING STREET

This space is currently an empty office, but I haven't been able to get it rented. I'd like to convert it to an apartment that I would move in to! The second and third floors are already apartments with tenants in them.

I have converted the non fire rated doors to fire rated doors.

1200 square feet per floor. there are 3 floors and a basement.

There are smoke and carbon monoxide detectors that are photoelectric.

There will be a sprinkler over the furnace in the basement.

There will be a railing for the second egress for the third floor. This work is starting 10/20/14
