Please find the plans and permit application attached for the foundation replacement at the Horse Barn. We have prepared the plans in house as the project is pretty simple and we did not think it needed an engineer involved. The project costs are far below the \$50k threshold requiring the engineers certifications and stamps.

Tammy and Jeff this is the application that we spoke about a few weeks ago and hoped that it would be expedited so as to remove the eye sore that the City currently has near the stadium, Expo and ice arena. See pics attached of reminder.

Thank you for your assistance.
