Hi Jeanie,

Confirmed structural engineer oversight. Chappell Engineering is the company that is responsible for this project.

Dick

Hi Dick,

I have reviewed the plans for this project and will be able to approve it once I receive confirmation from you that there will be oversight of the structural installations by an engineer.

I will then add a condition of approval stating that at completion of the project a letter shall be submitted verifying compliance with the installation specifications.

Please let me know if you have any questions.

Thanks,
 Jeanie

Good morning. I am checking in to see if you need any information before approving the BP application as I see that the BP application is still in zoning review. This is a co-location on a roof-top and is BP only and does not need administrative authorization.

Please let me know if you need any other information as T-Mobile would like to start construction in beginning

of October.

Thank you for your help.

Hello Mr. Man:

I apologize for the delay in getting back to you. I have just looked for an administrative authorization application or some other site plan application that would require review by the planning division. I do not find an application for review. It may be that you only need building permits for this installation. Did you submit an application for site plan review?

Thank you.

Barbara

Dear Ms Barhydt/Ms. Machado;

Just wondering if you have a chance to review the BP application for T-Mobile's roof top antennae addition at 284 Danforth Street? We are hoping to approval before end of this month and start construction soon after BP is approved.

Thanks for your assistance.

Regards,

Dick Man
