

Professional design, installation and service of solar energy systems

September 14, 2016

City of Portland  
389 Congress Street  
Portland, ME 04101

RE: ReVision Energy Air source heat pump installation at 167 Grant Street, Portland, Maine.

Dear Code Enforcement,

ReVision Energy has been contracted to design and install an air source heat pump system at the above address in Portland. This letter is to confirm that all work will be performed by licensed and qualified installers, expert in the field and in compliance with both manufacturer's recommendations and all applicable local and state codes and standards. This also confirms that the structure can handle the weight of the system. The weight of the system does not change the structural integrity of the building.

ReVision Energy employs licensed engineers, plumbers, and electricians and carries the solar industries highest certifications (NABCEP) in both solar thermal and photovoltaic installation. We're committed to high quality, code compliant work and look forward to working together with the city and the CEO to ensure that all your requirements and needs are met and that our customer ends up with a system that is beautiful, functional and safe.

Electrical and grounding:

All electrical work to be performed by a licensed ME electrician and will conform to NEC 2011 revision as well as NABCEP standards. Specifically, wiring of the air source heat pump system will be governed by manufacturer's recommendations and article 690.

If you have any questions or concerns, we'd like to address them as quickly and completely as possible. Please don't hesitate to call or e mail anytime.

Respectfully,

Fortunat Mueller, P.E.  
Co-owner  
ReVision Energy
