	CONDITION(S) OF APPROVAL
This P	ermit is being issued with the understanding that the following conditions are met:
Appro	oved with the following conditions: X/ X/8 K/9 X20 X2X
<b>4</b> 1.	This permit does not excuse the applicant from meeting applicable State and Federal rules and laws.
2.	Before concrete for foundation is placed, approvals from the Development Review Coordinator and Inspection Services must be obtained. (A 24 hour notice is required prior to inspection)
3.	Precaution must be taken to protect concrete from freezing.
4.	It is strongly recommended that a registered land surveyor check all foundation forms before concrete is placed. This is done to verify that the proper setbacks are maintained.
5.	Private garages located beneath habitable rooms in occupancies in Use Group R-1, R-2, R-3 or I-1 shall be separated from adjacent interior spaces by fire partitions and floor/ceiling assembly which are constructed with not less than I-hour fire resisting rating. Private garages attached side-by-side to rooms in the above occupancies shall be completely separated from the interior spaces and the attic area by means of ½ inch gypsum board or the equivalent applied to the garage means of ½ inch gypsum

All chimneys and vents shall be installed and maintained as per Chapter 12 of the City's Mechanical Code. (The BOCA National

Guardrails & Handrails: A guardrail system is a system of building components located near the open sides of elevated walking surfaces for the purpose of minimizing the possibility of an accidental fall from the walking surface to the lower level. Minimum height all Use Groups 42", except Use Group R which is 36". In occupancies in Use Group A, B, H-4, I-1, I-2 M and R and public garages and open parking structures, open guards shall have balusters or be of solid material such that a sphere with a diameter of 4" cannot pass through any opening. Guards shall not have an ornamental pattern that would provide a ladder effect. (Handrails shall be a minimum of 34" but not more than 38". Use Group R-3 shall not be less than 30", but not more than 38".)

Stair construction in Use Group R-3 & R-4 is a minimum of 10" tread and 7 3/4" maximum rise. All other Use group minimum

Every sleeping room below the fourth story in buildings of use Groups R and I-1 shall have at least one operable window or exterior door approved for emergency extess or rescue. The units must be operable from the inside without the use of special knowledge or separate tools. Where windows are provided as means of egress or rescue they shall have a sill height not more than 44 inches (1118mm) above the floor. All egress or rescue windows from sleeping rooms shall have a minimum net clear opening height dimension of 24 inches (610mm). The minimum net clear opening width dimension shall be 20 inches (508mm),

Each apartment shall have access to two (2) separate, remote and approved means of egress. A single exit is acceptable when it

All vertical openings shall be enclosed with construction having a fire rating of at lest one (1) hour, including fire doors with self

The boiler shall be protected by enclosing with (1) hour fire-rated construction including fire doors and ceiling, or by providing

All single and multiple station smoke detectors shall be of an approved type and shall be installed in accordance with the

exits directly from the apartment to the building exterior with no communications to other apartment units.

Sound transmission control in residential building shall be done in accordance with Chapter 12 section 1214.0 of the city's

Handrail grip size shall have a circular cross section with an outside diameter of at least 1 1/4" and not greater than 2".

board or the equivalent applied to the garage side. (Chapter 4 Section 407.0 of the BOCA/1996)

The minimum headroom in all parts of a stairway shall not be less than 80 inches. (6' 8")

closer's. (Over 3 stories in height requirements for fire rating is two (2) hours.)
