The Peer Reviewer is completing the review and has asked me to check with you regarding one piece of data that is fairly critical to the assessment.

The submitted East Tower building elevations show that the helipad is at 271' 10" above SL (see attached). However, the FAA Heliport Application states (box 9 on attached) that its at 240 feet elevation.

This difference of 30+ feet impacts the assessment and we would be grateful if you could confirm the correct elevation for the new helipad.

thank you
Jean

Hi Jean,

Checking in about the status of this review. Is there anything you need from us to would be helpful?

Thank you,

AI
