Hi Nell,

It doesn't seem the comments I had emailed you on 11Sep in the PDF were implemented, so I've attached a scan of a hard-copy mark-up of the 18Sep version to make the comments easier to see.

One comment not in the scanned mark-up is regarding section 2c. To clarify and document the number of operations considered by this SMP, I suggest a table showing the:

- a) existing annual operations,
- b) operations increase (delta) due to growth (from increased demand),
- c) reduction (decrease delta) due to addition of 2nd helipad and
- d) total net forecast number of annual operations.

This finalizes and concludes my comments. I hope this has helped.

Thank you,

Joe.

Nell, Christine,

Attached is the most recent draft of the SMP with the lmax comparison (in the appendix) and the list of properties eligible for mitigation. We abandoned the idea of identifying a cone of eligibility because it became too difficult to factor in the grade change of the surrounding environment. Instead, we identified a radius of 400' around the pad and listed the properties within that circle.

Thank you,

AI
