Agreed, sorry, I thought I'd chimed in here already. I think Mike's comments cover it.

Quick question about the mountable curb & driveway: it looks like the spot grades given indicate the 'tipdowns' aren't really tipping down at all. They show 3" of reveal on each side. Is this right or are they meant to reduce curb reveal from something greater than 3" down to the 3" specified for the mountable curb?
