Hi Chris,

Chatting briefly with Nell about your email, we would find these acceptable for a yet-to-be determined percentage of the bike parking to be provided on campus. As you can imagine, we'll want to know: where in the garage; how many; how accessible and visible it is; who the intended users are (visitors, employees, etc); and, what the distribution and type of bike parking is as part of your overall campus bike parking plan.

Thanks for checking in - we appreciate being able to chime in at good check-points in the process.

Best regards,

Bruce

Bruce and Nell:

I hope you all are doing well.

We are exploring options for additional bike parking and identified the [Dero Ultra Space Saver](#) as a potentially good option for our patient/visitor parking garage (outside public ROW) because it could give us 45 spaces (compared to only 15 spaces if using the classic “inverted u” style). Does this style seem appropriate to you? I’ve seen it used in some of the newer buildings around town, like in some of the East End condos.

Thanks!
