Hi Nell - attached are revised agreements. I'll note that I think the exhibits depicting the easement/license areas need to be better. At the very least, they need to clearly show where on the face of the earth they are, what their dimensions are, and be clearly labeled. We also need a metes and bounds description for the public sidewalk. Has Bill Scott reviewed these yet? He often has helpful comments as well.

Let me know if you have any questions or would like to discuss.
