Updated: April 23, 2014 - 11 -

(Note: Please submit calculations showing the derivation of your design flows, either on the following page, in the space provided, or attached, as a separate sheet)

4. Please, Submit External Grease Interceptor Calculations. Total Drainage Fixture Unit (DFU) Values: Size of External Grease Interceptor: Retention Time: Peaking Factor/ Peak Times:	Not Required				
(Note: In determining your restaurant process water flows, and the size of your external grease interceptor, please use The Uniform Plumbing Code. Note: In determining the retention time, sixty (60) minutes is the minimum retention time. Note: Please submit detailed calculations showing the derivation of your restaurant process water design flows, and please submit detailed calculations showing the derivation of the size of your external grease interceptor, either in the space provided below, or attached, as a separate sheet)					
5. Please, Submit Industrial Process Wastewater Flow Calc	ulations				
Estimated Industrial Process Wastewater Flows Generated:	0	GPD			
Do you currently hold Federal or State discharge permits?	Yes	No			
Is the process wastewater termed categorical under CFR 40?	Yes Tes	No			
OSHA Standard Industrial Code (SIC):	http://www.osha.gov/osh	nstats/sicser.html			
Peaking Factor/Peak Process Times:					
(Note: On the submitted plans, please show where the building's dom commercial process wastewater sewer laterals exits the facility. Also, Finally, show the location of the wet wells, control manholes, or other traps)	show where these building sewer laterals ent	er the city's sewer.			
(Note: Please submit detailed calculations shown either in the space provided below, or					
Notes, Comments or Calculation					

This is a standard residential building with a mix of 1 and 2 bedroom apartments. The total number of units will be between 33 and 37.
