Hi Shukria,

We have resolved all of the issues with the power to the Carlton Street project. We will be going underground from West Street along the side walk to the site. Attached are the revised drawings showing that route. Please put this into your system for final approval. The project is out to bid and we hope to start soon. Thank you for your help.

Please take a look at the revised plans; let me know if you need a detail of the pole at the corner.

Hi Shukria and Tom,

Please note that the revised plan accomplishes the following which I heard to be important at our meeting last Wed.

1. It requires the setting of only one new pole
2. The location of the new pole does not interfere with current pedestrian access nor will it interfere with potential accessibility upgrades at the crosswalks of Carleton and West Street.
3. The visibility of the stop sign is not impeded by the placement of the new pole. It is relocated in front of the pole and also closer to the curb which allows it to be visible from both directions on West Street.

Please let me know if you have any additional questions and thanks for your help.

Drew
