Hi,

I'm writing about a site plan review application for a project at 722 Congress St which we submitted for permit last month. The project is a 485 SF addition to an existing building at 722 Congress. I believe we are able to submit an administrative authorization application because the project is under 500 SF. I've attached the application and pdf copies of the permit documents for your review. Please let me know at your earliest convenience if I need to submit a different application or if you need any additional information.

Thank you for your help.

Amy
