Re: 696 Congress Street Notice of March 9, 2010

If it meets your approval we will have a plan of action to bring the building up to code to you by April 1, 2010. The building has gone through several periods of owners and we are in the process of determining what needs to be done with each opening. Having oversized doors that need to be replaced, in a manner that retains the character of the building, further complicates the work. We are now just getting all the information from suppliers on what can be provided to complete the project and bring it up to the fire department standards.

Sincerely yours,

Mark A. Mawhinney
