Date: March 7th, 2011

Re: Action Plan

The initial inspection revealed

#1 Refrigeration- we have one refrigerator in our assembly area in the kitchen that needs to be replaced- ideally.

Oliver Outerbridge , former owner is shopping and hopefully picking up a new unit today.

#2- Lighting- We will extend the track lighting or install new lighting in kitchen prep areas. Light bulbs must meet restaurant regulations.

Bulbs cannot explode- but rather implode. We have selected our master electrician to complete the work.
