

May 7,2008

Dear Ben,

I have just spoken with one of your colleges regarding the fire violations at 189/191 Clark Street, Portland ME. It is my understanding that I need to replace any door leading into both front and back egresses with 45 minute fire doors. I also understand I will need to install a sprinkler above the furnace in the basement of the building.

Given the of the current economy I hope to replace 2 doors every 6 months, till up to code. I will however have the sprinkler put in as soon as possible. I hope this arrangement is agreeable with the Fire Department.

Thank You,

Edward Ingalls
