Re: Request for building permit

Project description:

We want to remove the existing enclosed back porch off of the first floor, which is 4'x12' see Photo A, B, and D. In it's place, we want to build an 8'x12' deck. (See Design 1.) The deck will incorporate the existing back stairs. The depth of the deck will not exceed the depth of the existing back stairs.

In addition, we want to put in four windows along the back wall on the first floor to mirror the look of the four windows on the second floor. (See Design 2 and Photo A.) This will create a much nicer, uniform look to the backside of the house. (Something everyone, including our neighbors can appreciate.)

We have met with Bill Necelleman from the Historic Preservation.

He has reviewed these ideas and agreed that they will add value to the house and not compromise its historic appeal.

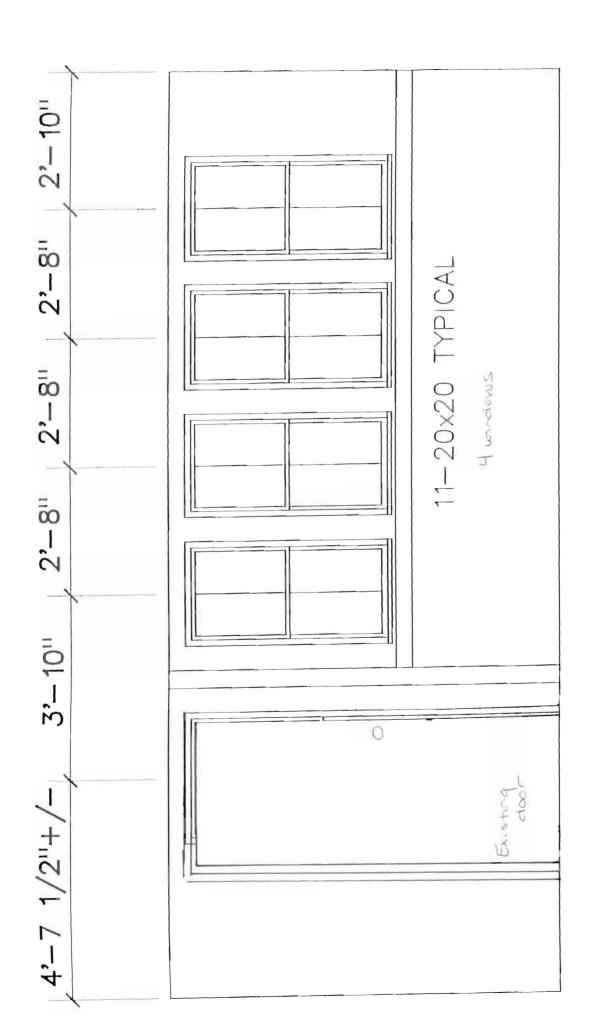

The work is to be done by John Burrill Builders of Winham, ME (See Estimate.) His references have confirmed that he will perform the work most adequately within an appropriate timeframe (1 month) and cost (\$3K).

Thank you for your review.

If additional information or comments are needed, please contact us at 761-9365.

We look forward to improving our home with these renovations.

Re: 38 Cushman St. CBL: 056-D-004

Dear Mr. & Mrs. Molinoff:

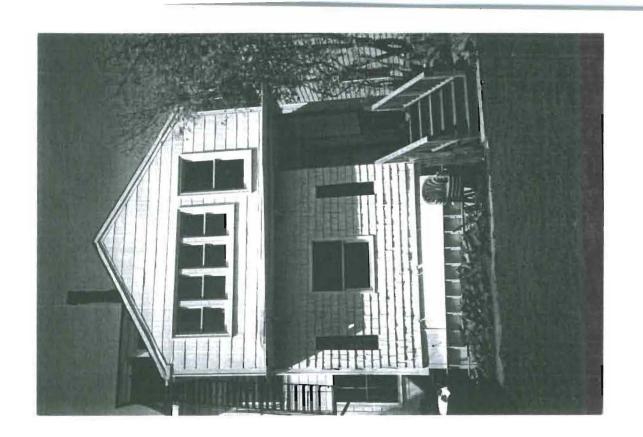

This letter verifies that work performed under Building Permit #99028 and #000523 issued by the City of Portland at the above address has been completed. Inspections have been recorded and are in accordance with the applicable code requirements.

Please feel free to call me, Jeanie Bourke @ 874-8715 if you have any questions.

Sincerely,

Jeanie Bourke

Code Enforcement Officer

BUILDING PERMIT REPORT

	BUILDING FERMIT REPORT			
DAT	TE: 9/MAY /2000 ADDRESS: 38 Cushnan ST. CBL: 056-D-004			
REA	SON FOR PERMIT: Replace existing deck in rear - and add windows			
BUI	LDING OWNER: /he Molinofts			
	AMIT APPLICANT: 100 NTRACTOR John Burrill Builder			
USE GROUP: R-2 CONSTRUCTION TYPE: 5 B CONSTRUCTION COST: 3,000,00 PERMIT FEES: 424 The City's Adopted Building Code (The BOCA National Building code/1999 with City Amendments) The City's Adopted Mechanical Code (The BOCA National Mechanical Code/1993)				
				CONDITION(S) OF APPROVAL
This	permit is being issued with the understanding that the following conditions are met: 41, 42 4/1 4/3 427, 429			
	This permit does not excuse the applicant from meeting applicable State and Federal rules and laws. Before concrete for foundation is placed, approvals from the Development Review Coordinator and Inspection Services must be obtained. (A			
	24 hour notice is required prior to inspection) "ALL LOT LINES SHALL BE CLEARLY MARKED BEFORE CALLING."			
	Foundation drain shall be placed around the perimeter of a foundation that consists of gravel or crushed stone containing not more than 10			
	percent material that passes through a No. 4 sieve. The drain shall extend a minimum of 12 inches beyond the outside edge of the footing. The thickness shall be such that the bottom of the drain is not higher than the bottom of the base under the floor, and that the top of the drain is not			
	less than 6 inches above the top of the footing. The top of the drain shall be covered with an approved filter membrane material. Where a drain			
	tile or perforated pipe is used, the invert of the pipe or tile shall not be higher than the floor elevation. The top of joints or top of perforations			
	shall be protected with an approved filter membrane material. The pipe or tile shall be placed on not less than 2" of gravel or crushed stone, and			
	shall be covered with not less than 6" of the same material. Section 1813.5.2			
	Foundations anchors shall be a minimum of $\frac{1}{2}$ " in diameter, T " into the foundation wall, minimum of 12" from corners of foundation and a			
	maximum 6' O.C. between bolts. <u>Section 2305.17</u> Waterproofing and dampproofing shall be done in accordance with <u>Section 1813.0</u> of the building code.			
	Precaution must be taken to protect concrete from freezing. Section 1908.0			
	It is strongly recommended that a registered land surveyor check all foundation forms before concrete is placed. This is done to verify that the			
	proper setbacks are maintained.			
	Private garages located beneath habitable rooms in occupancies in Use Group R-1, R-2, R-3 or I-1 shall be separated from adjacent interior			
	spaces by fire partitions and floor/ceiling assembly which are constructed with not less than 1-hour fire resisting rating. Private garages attached			
	side-by-side to rooms in the above occupancies shall be completely separated from the interior spaces and the attic area by means of ½ inch			
	gypsum board or the equivalent applied to the garage side. (Chapter 4, Section 407.0 of the BOCA/1999) All chimneys and vents shall be installed and maintained as per Chapter 12 of the City's Mechanical Code. (The BOCA National Mechanical			
	Code/1993). Chapter 12 & NFPA 211			
	Sound transmission control in residential building shall be done in accordance with Chapter 12, Section 1214.0 of the City's Building Code.			
11.	Guardrails & Handrails: A guardrail system is a system of building components located near the open sides of elevated walking surfaces for the			
	purpose of minimizing the possibility of an accidental fall from the walking surface to the lower level. Minimum height all Use Groups 42". In			
	occupancies in Use Group A,B.H-4, I-1, I-2, M and R and public garages and open parking structures, open guards shall have balusters or be of			
	solid material such that a sphere with a diameter of 4" cannot pass through any opening. Guards shall not have an ornamental pattern that would provide a ladder effect. (Handrails shall be a minimum of 34" but not more than 38". Exception: Handrails that form part of a guard shall have			
	a height not less than than 36" and not more than 42". Handrail grip size shall have a circular cross section with an outside diameter of at least 1			
	4" and not greater than 2". (Sections 1021 & 1022.0). Handrails shall be on both sides of stairway. (Section 1014.7)			
12.	Headroom in habitable space is a minimum of 7'6". (Section 1204.0) See attachments.			
	Stair construction in Use Group R-3 & R-4 is a minimum of 10" tread and 7 1/4" maximum rise. All other Use Group minimum 11" tread,			
	7" maximum rise. (Section 1014.0) See attach monts			
14.	The minimum headroom in all parts of a stairway shall not be less than 80 inches. (6°8°°) 1014.4 Every sleeping room below the fourth story in buildings of Use Groups R and I-1 shall have at least one operable window or exterior door			
1.5.	approved for emergency egress or rescue. The units must be operable from the inside without the use of special knowledge or separate tools.			
	Where windows are provided as means of egress or rescue they shall have a sill height not more than 44 inches (1118mm) above the floor. All			
	egress or rescue windows from sleeping rooms shall have a minimum net clear opening height dimension of 24 inches (610mm). The minimum			
	are clear opening width dimension shall be 20 inches (508)mm, and a minimum net clear opening of 5.7 sq. ft. (Section 1010.4)			

16. Each apartment shall have access to two (2) separate, remote and approved means of egress. A single exit is acceptable when it exits directly

17. All vertical openings shall be enclosed with construction having a fire rating of at least one (1) hour, including fire doors with self closer's.

18. The boiler shall be protected by enclosing with (1) hour fire rated construction including fire doors and ceiling, or by providing automatic

from the apartment to the building exterior with no communications to other apartment units. (Section 1010.1)

(Over 3 stories in height requirements for fire rating is two (2) hours. (Section 710.0)
