**Attachments:** plotplanshedatSpruce.pdf; Shed Permit.pdf; sheddetail1.pdf; sheddetail2.pdf

---

Attached are:

1. General Building Permit Application
2. Plot plan showing proposed location of shed
3. Shed detail - Front view
4. Shed detail - Side view

Notes: Application was sent electronically twice but apparently did not make the trip. The software the city is using in my opinion is NOT user friendly.

Payment for permit has been arranged with Gail and is "pending".

Construction details - stick built with 6" PT floor joists, 6" rafters and 2 x 4 walls (green rough cut hemlock). Vertical ship-lap siding stained light gray to match residence. May add cupola if time and resources allow.

THANK YOU to Ann and Gail for all their help and guidance with this permit. Very much appreciated!!!
