337 Danforth Street

Dear Mr. & Mrs. Albert:

An inspector from our department has had occasion to look at the boiler at the above premises and finds that it is in very poor working order. The general deteriorated condition of the burner unit, which is not secured properly to the floor, the loose wiring, the draft control is insecure, the automatic control covers are missing, the flue to the chimney and generally the heating system in itself is extremely poor and should be replaced with post haste.

Please be advised of this as it is now a hazardous condition for the occupants of the building.

HOUSING INSPECTIONS DIVISION
HEALTH DEPARTMENT

To: R. L. Brown - Building Inspection

Date: January 17, 1974

From: Lyle D. Noyes, Chief of Housing Inspections

Subject: Heating Boiler - 389 Danforth Street, Portland, Maine

Conditions or Defects: I recently received a call from a Rev. Junko, the father of Mrs. Wilcox who lives at 389 Danforth Street. He said that he was referred to this division from your department to make a complaint on the condition of boiler that he believes to be explosive because of the frequency that water must be added.

Will you please have the plumbing inspector take a look at this boiler. I believe in an instance of this sort a technician would be better able to give the proper advice.

Bob,
1/18/74

I am returning this referral to your dept for action under cc: City Manager Sections 2001.2.1 and 206.1 of the former building code. I would suspect that BOCA would be at least as stringent in this instance.

Lyle D. Noyes
