RE: ST. LOUIS ROMAN CATHOLIC CHURCH

Dear Barbara,

We are pleased to submit the attached application for adding 3 new parking spaces and a wheelchair lift to the St. Louis Roman Catholic Church on Danforth Street. Currently there is no easy way for wheelchair people to access the building. By adding the lift we are able to allow them easy access to the church.

The access location will be through a reconfigured window on the east side of the building. We have investigated other locations for the lift or ramps and determined this is the best fit.

The total of new impervious cover that we are adding to the site is 762 sq. ft. This is below the threshold for requiring stormwater treatment.

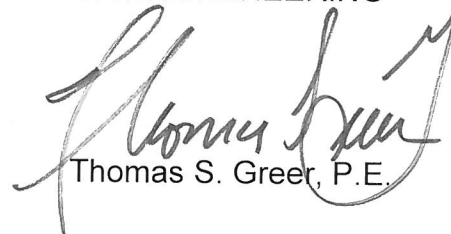

We do not anticipate any change in the traffic to or use of the church.

We would like to complete this project in the early spring as soon as the paving plants open.

Please let me know if you have any questions.

Sincerely,

PINKHAM & GREER,  
CIVIL ENGINEERING

Thomas S. Greer, P.E.
