Re: Fire Department Communications

Proposed T-Mobile Roof-Top Communication Installation at
284 Danforth Street, Portland, ME

My name is Dick Man and I am a Site Acquisition Specialist for Nanepashemet Project Management Inc. I have been retained by T-Mobile Northeast LLC ("T-Mobile"), to provide services for the purpose of obtaining approvals, leases, and licenses as well as performing other site acquisition and development tasks involved in building and installing wireless communication facilities.

T-Mobile is applying for a building permit to install new communications equipment on the roof-top of Harbor Terrace, a Portland Housing Authority apartment building, at 284 Danforth Street, Portland, Maine.

On February 5, 2015, I described the proposed project to City of Portland Fire Prevention Officer, Mr. Craig Messinger. Mr. Messinger stated that there is no requirement to submit documentation for this proposed installation.
