---

Hi Dick:

Thank you for sending me the material. There are times when a site is within an historic district or generators are being added that require site plan review. In this case, a site plan review is not needed. Thank you for checking.

I have added Ann Machado, Jeanne Bourke and Laurie Leader to this e-mail so that they are aware of my decision.

Thank you.

Barbara

[Thanks for taking my call. Please find attached CD for your review.](#)

We are hoping to get BP approved before end of this month. Anything you can do to expedite this will be much appreciated.

No. This is a co-location on a roof-top and is BP only. It does not need administrative authorization.

Hello Mr. Man:

I apologize for the delay in getting back to you. I have just looked for an administrative authorization application or some other site plan application that would require review by the planning division. I do not find an application for review. It may be that you only need building permits for this installation. Did you submit an application for site plan review?

Thank you.

Barbara

Dear Ms Barhydt/Ms. Machado;

Just wondering if you have a chance to review the BP application for T-Mobile's roof top antennae addition at 284 Danforth Street? We are hoping to approval before end of this month and start construction soon after BP is approved.

Thanks for your assistance.

Regards,
