Talon® Double-Hung Windows

The lower sash features a taller bottom rail and traditional stile and rail design. This classic look provides style and functionality, while maximizing performance.

Sleek design, innovative functionality

Both the top and bottom sash operate and tilt inward. The innovative sash lock mechanism allows you to easily lock your windows or tilt the sash in for easy cleaning.

Our jamb liner options provide simple or sophisticated options. Select from our synthetic interior and exterior inserts or add a painted aluminum exterior or wood-veneered interior insert.

Passive Impact Stability System for coastal regions

The Talon HarborMaster® window requires no extra steps to engage the impact component. A minimum of two snubbers, applied to the sill, create a structural connection between the lower sash and frame. Simply close and lock the window and it's ready to withstand even the toughest weather conditions.

Talon RetroFit windows

Talon RetroFit double-hung windows fit into existing window frames making installation a breeze. The appearance of the interior and exterior of the home are maintained because the existing frame, wall coverings and trim work stay completely intact. [Learn more.](#)

Replacement Sash Kits

Our clad double-hung replacement sash kits include window sashes, locking hardware and sash lifts, compression jamb liners and balance systems, sill dam, head parting stop and installation hardware. Each kit is built to your exact specifications. [Learn more.](#)

Window Opening Control Device

Window opening control device are now available for use with Talon double-hung windows. [Learn more.](#)

VeriLock® Sensors *new!*

An innovative technology that integrates wireless security sensors into select double-hung windows. These exclusive sensors are unique as they detect whether the windows are locked or unlocked* - a feature no other sensors can provide. [Learn more.](#)

**When properly configured and maintained with a professionally installed Honeywell® security system.*

Divided Lights

Home > Design Freedom > Unlimited Views > Divided Lights

Divided Lights

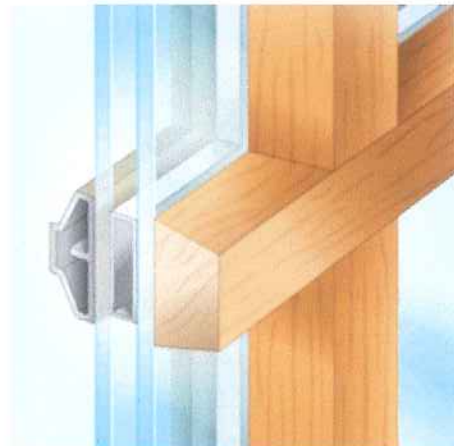

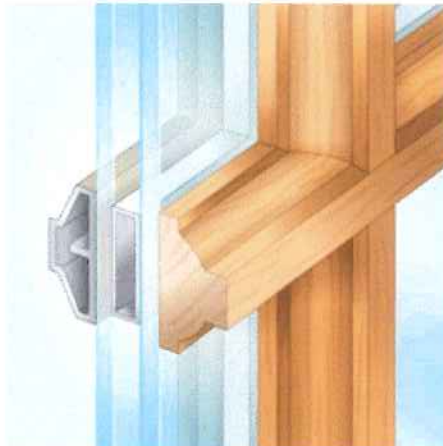

We offer divided lights in four styles and two profiles to add architectural detail or visual interest to your design. Choose a traditional [pattern](#) or vary lines, curves and shapes to create your own unique [pattern](#). Mix profile widths for even greater visual impact.

Modern Divided Lights (MDL)

Modern Divided Lights feature fixed interior and exterior grilles with spacers between two panes of insulated glass, maintaining a historical look and our high energy-efficiency standards. Available in colonial or contemporary profiles and widths of: 2-1/4", 1-1/2", 1-1/8", 7/8" or 5/8".

Colonial

Contemporary

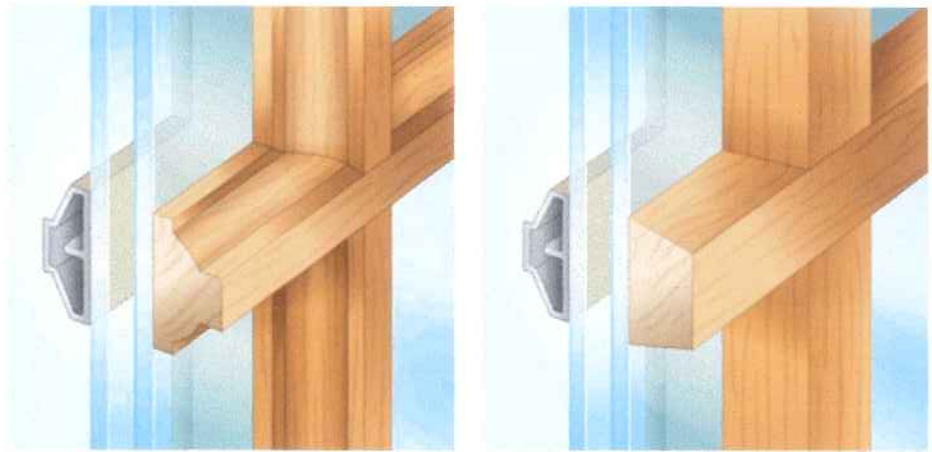

Classic Divided Lights (CDL)

An economical solution with traditional beauty, our Classic Divided Lights feature fixed exterior and interior grilles without an internal spacer. Available in colonial or contemporary profiles and widths of: 2-1/4", 1-1/2", 1-1/8", 7/8" or 5/8".

Eagle Axiom® Casement Windows

Home > Products > Eagle Axiom® Casement Windows

Eagle Axiom® 11 Casement Windows

We've redesigned our casement window to provide improved energy efficiency and comply with U.S. ENERGY STAR® Version 5.0 requirements in the Northern Zone (0.30 U-Factor or lower). Our redesigned casement window features a Fibrex® material thermal barrier, limiting the amount of heat transfer from the aluminum exterior to the interior of the window.

Plus, we've repositioned the frame weather strip onto the Fibrex material for improved surface contact with the sash, allowing for a tighter seal.

Easy operation, brilliant performance

Simple, beautiful and extremely functional, our casement windows feature stainless steel operating hardware at no additional charge. Plus, they open to 90° for great ventilation and easy cleaning.

*Heavy-duty stainless steel single or dual arm operators, tracks & brackets add maximum corrosion resistance**

Durable and dependable stainless steel hinges & tracks allow the sash to be opened to 90° for easy cleaning

Uniquely styled stainless steel sash lock keepers resist corrosion & help to seal the sash tightly against the weather strip*

French casement windows

Eagle Axiom french casements provide expansive views and added ventilation.

Eagle Axiom retractable insect screens

Specifically designed for Eagle Axiom casements, this insect screen is housed out of sight on the inside of the window sash when not in use for an unobstructed view. [Learn more.](#)

Push out casement & awning windows

[Learn more](#) about our push out casement and awning windows.

VeriLock® Sensors *new!*

An innovative technology that integrates wireless security sensors into select casement windows. These exclusive sensors are unique as they detect whether the windows are locked or unlocked** - a feature no other sensors can provide. [Learn more.](#)

E-Series Eagle Axiom 5 Series 

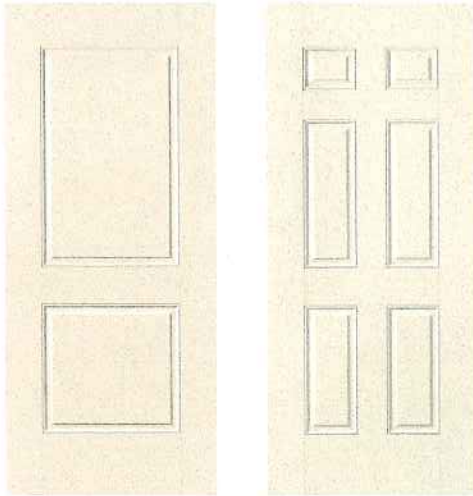

• Reach new heights.

The Smooth-Star fiberglass door portfolio expands to include the popular 2-panel square top and 6-panel door styles in 7'0" height. Designed to fit more openings, the 7'0" doors offer new options for taller entries with the same crisp, clean contours of this smooth, paintable fiberglass door line.

Available February 2, 2015

New 7'0" Door Options

2-Panel Square Top
\$220
2'8" x 7'0"
2'10" x 7'0"
3'0" x 7'0"

6-Panel
\$210
2'8" x 7'0"
2'10" x 7'0"
3'0" x 7'0"

Available Glass Designs

Additional Specialty Glass Options:
Simulated Divided Lites (SDLs)
Grilles Between Glass (GBGs)
Removable Wood Grilles
Fixed Grilles

Available Glass Shapes

Tru-Advantages

- **Market-driven design to win more business.**
 - Further capitalizes on trends toward new homes built with taller ceilings. Provides additional replacement opportunities for homes with existing 7'0" openings.
 - On-trend 2-panel square top door style is designed to appeal to more customers within this popular smooth, paintable fiberglass entry door line.
 - Classic 6-panel design is ideal for homes with traditional styling and fits a wider variety of glass shapes for more flexibility.

- **Aimed at creating sales opportunities.**
 - Versatile 7'0" doors can be used in multiple applications, including front entry, side, house-to-garage and hinged patio doors.
 - Flexible 2-panel square top and 6-panel designs can be configured with existing glass product to create more than 350 new Smooth-Star door and glass combinations in the 7'0" height.
 - Creates an interchangeable portfolio of 2-panel square top and 6-panel Smooth-Star door styles across 6'8", 7'0" and 8'0" door heights.

- **Smooth-Star Doors – The more attractive and durable alternative to steel.**
 - Ready to paint – no buffing or priming required; patented smooth texture gives the effect of fine sanded wood.
 - Unlike steel, fiberglass won't dent or rust. Unlike wood, it won't warp or rot.
 - A Therma-Tru fiberglass door system with genuine Therma-Tru components is backed by the industry's most comprehensive lifetime limited warranty.

Fire-Rated Options Tru-Defense Eligible WBDR Options*
