Building Demolition Notification Form (BDNF)

Important Notice: Maine law requires the filing of this <u>Building Demolition</u> <u>Notification Form</u> prior to demolition of any building except a single-family home

1) <u>Building owners are required to provide this notification of the demolition of a building to the DEP at least 5 working days prior to the demolition.</u> This notification is **not** required before the demolition of a single-family residence or related structure (e.g., garage, shed, barn). It is also not required if previous notification of the demolition has been provided to the DEP as part of an asbestos abatement project notification. *Demolition* means the tearing down or intentional burning of a building or part of a building.

2) <u>Prior to demolition, building owners must determine if there is any asbestos-containing material(s) (ACM) in the building.</u> An "asbestos inspection" by a DEP-licensed Asbestos Consultant is required for all buildings except single-family homes and residential buildings with 2-4 units built after 1980. In lieu of an asbestos inspection, pre-1981 residential buildings with 2-4 units can be surveyed to identify possible ACM by someone knowledgeable about ACM, such as a code enforcement officer or building inspector). If materials that may contain asbestos are found, then you can either assume they are ACM or hire a DEP-licensed Asbestos Consultant to test the materials.

3) Whenever more than 3 square feet or 3 linear feet of ACM is identified, the ACM must be abated in accordance with the <u>Maine Asbestos Management Regulations</u> by a DEP-licensed Asbestos Abatement Contractor. This includes materials presumed to be ACM. Check www.state.me.us/dep/rwm/asbestos/index.htm for a listing of asbestos contractors.

Prior to issuing a local demolition permit, the DEP requests that **municipalities** have applicants for municipal demolition permits complete this form and fax it to the DEP at 207-287-7826. Municipalities should not issue local demolition permits if the required asbestos inspection or survey has not been performed and identified ACM removed.

Were asbestos-containing materials found? 🗆 yes 🗳 no 📋 no inspection or survey required (post-1980 2-4 unit)
