

To; Portland Fire Dept.

To interested parties,

On 04 and 13 Feb 15 we tested the Fire Alarm System serving Portland Yacht Services New Yard at 100 West Commercial St, Portland, Me. Both new and existing devices were tested. The system is installed to meet NFPA 101 and 72.

All devices and circuits were tested for proper operation. The signals to the Centralarm U.L. Central Station were verified for proper reception and definition.

The radio master box has been programmed and tested with the City Fire Alarm Electrician, Dick Andrews and is ready to put on line.

The system is fully operational at this time.

Thank You, John Kimball
