**RE: Portland International Marine Terminal
Wharf Infill & Building Removal Project
Level II Permit Application**

Dear Barbara,

On behalf of the Maine State Department of Transportation (MaineDOT), we are pleased to submit this Level II Site Plan Application and supporting materials related to the improvements at the Portland International Marine Terminal (IMT). The project is located east of the Casco Bay Bridge at the existing IMT wharf, and will increase the square footage of the wharf by demolishing the existing maintenance building and constructing approximately 9,000 square feet of new wharf area.

Attached you will find one electronic copy of the documents. The application fee will be hand delivered soon after the time of this electronic submittal.

We look forward to working with the Planning Department staff as you review this project. Please feel free to contact me to discuss any questions or concerns you may have regarding the attached application materials.

Sincerely,

Craig Morin
Project Manager
