

10. Written Request for Waivers from Site Plan or Technical Standards

Written Requests for Waivers

Waiver Request 1: Flooding Standard

Technical Standard, Section 5.III.4.E (2) for flooding. Waiver of the flooding standard due to direct discharge into the ocean, a great pond, or major river segment.

Due to the capacity of the receiving body (Fore River) and the proposed method of conveying the runoff to the river (sheet flow and combined sewer overflow) it is requested that the requirement of the Flooding Standard be waived for this project.
