---

Hi-Back Inspections,

I am sending a PDF of an application.  
We can-not find a specific permit amendment app...so we improvised.

If fees are required, I have cc'd the general contractor.

Yes, the plans attached only reflect revisions to the project.

Thank you,

mark

Hi Mark

You do need to provide an actual permit application detailing the job description / changes to the original permit. Please make sure you are providing only plans and detail of any changes this time.

>>> Mark Mueller <[mark@muellerarchitects.com](mailto:mark@muellerarchitects.com)> 2/18/2016 12:31 PM >>>

All parties,

In discussions with John Rioux, he has asked us to submit a 'permit amendment' for the Ansel Residence.

Lori, as John mentioned over the phone the finish first floor was inadvertently raised in construction.

Most likely due to the 'fall-out' shelter nature of the concrete walls in the back of the project. Literally.

The building height is still well w/in the allowed.

Deb, I have outlined a few changes that affect the design.

I am available to review should you like.

They are mostly the client changing her mind half way in.

Thank you,

mark
