Re: Waynflete Lower School 360 Spring Street

Maine State Security Services has installed a new addressable fire alarm system at the new Waynflete Lower Schools 360 Spring Street Portland, Maine.

This is a 3 story sprinkled educational facility Plans were drawn up following NFPA 101 and 72, submitted and approved by the city and permit 2017-01343 was issued. The fire alarm system was installed as designed with the addition of several smoke detectors due to change of use of a storage room to an exercise room.

All elevator recall functions were tested with Pine State Elevator and the State inspector on July 24<sup>th</sup> 2018, Both Kitchen hoods were tested with the Hood Manufacture rep on 8-2-18, Sprinkler Devices were tested with the Sprinkler Systems Inc on 8-2-18,

The City Master box was installed on 8-6-18 programmed by PFD Michael Clinton and put in service. The system is also tied into a UL listed Central Station using 2 phone lines.

Installation was done in accordance with NFPA 72, NEC 2011, Life Safety Code, per approved plans by the Portland Fire Department and in accordance with the City of Portland Signaling System's Ordinance. All documents pertaining to the fire alarm system are in the document box.

Each one of the devices was tested from device to control panel and from the control panel to the Central Station and all devices have passed the testing. Testing was done 8-6-18

If you should have any questions please feel free to give us a call.

Sincerely,

Christopher L'Heureux  
Maine State Security
