to me

Hi Jeanie -

Here is the updated handrail design for the front steps of the church. In reviewing with Deb Andrews she requested a more simpler rail than what was proposed and she subsequently requested the handrail extension be excluded. So the rail would simply turn down at the bottom of the stair.

The other two items I wanted to discuss with you were:

1 - We are going to take advantage of the State exemption on egress window size on the 3rd floor level. This will allow us to stick with double hangs and avoid casements, which were bedeviling suppliers in how they would meet historic profiles...

2 - That other item I had forgotten was about eliminating an exterior egress to the office area on the first floor to accommodate HVAC condensers, but that is moot since the owners did not want to pursue the solution we had been discussing with Deb.

Best,
Matthew
