

Bugsy's Pest Control
PO Box 10424
Portland, ME 04104

To whom it may concern, and Inspector Fagone,

On March 27, 2015 I did a pest control application at 26 A Street Lodging Portland, Maine.

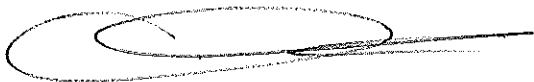

I did not find any evidence of infestation but we are doing on ongoing treatment plan.

The one problem I found was that the monitors had been removed from room I and room C.

They are interfering with my pest control program if they remove them.

Other than that I found no problems or bugs.

Anthony Ciriello

A handwritten signature in black ink, appearing to read 'Anthony Ciriello', with a long horizontal stroke extending to the right.
