Hello Paul,

Here are all the drawings and documents for the proposed Fire Escape @ 16 Gilman Street. Since the project is of such a limited scope and impact I did not think it was necessary to provide existing and new plans and elevations. If this is required for this submission please let me know.  
The e-mail sent to Tim underlined the "each PDF must be an individual file" and the "naming convention on the drawings was incorrect", which have been adjusted.

NOTE: This is one of two e-mails so I could attach all the files required for the submission.

Thank you,

Michael Chestnutt
