concrete pretty well broken up and has a hole at the floor level. The lath on Mrs Willis side are against this chimney. When they put in the support where the wood has been cut away for the new heater they knocked a wood panel carrying the electrical meter on it, out of place. Mrs Willis will have her lath removed and a cleare cut put in, if Mrs Day will fix this panel and repair the brickwork.

NOTES  
 Some not been replaced. This wall appears to be 2 courses thick but the remaining

11/2/10 6 - Talked with Mrs Day who agreed to remove the wall and place a new one. See copy of P.C. 36-203

AP 10 A Street-I

July 27, 1950

Coyne Brothers  
50 C Street  
South Fortland, Ms.,  
Mr. John H. Wiemert  
10 A Street

Gentlemen,

We have been delayed in issuing the building permit to cover construction of a one story open piazza on the right hand side as one faces the house at 10 A Street, because information on the application does not seem to be accurate.

The permit is now issued to Coyne Brothers, herewith, but subject to the following conditions. If this letter is not understood or if you for any reason are unable or unwilling to abide by these conditions, it is important that you refrain from starting the work and return the permit card immediately for adjustment.

There is the question of open space between the proposed piazza and the side lot line involved. The application says that the existing piazza is 4'x7' and that you propose to construct a new one story open piazza 4'x7' in its place with 5' between the side of the new piazza and the side property line.

Examination on the ground discloses that the present platform is only a little over 3' wide and a little over 5' long, adding in the length of the steps, the entire structure is 9'6" long. The hood over the platform is smaller than the platform, being about 2' wide and about 6' long. The present platform is a little over 5' from the side line fence.

No part of the new work is permitted to be closer than 5' to the actual side lot line, and you should make sure of that fact before starting the work.

To be precise about it, although we cannot be sure whether or not the side line fence is all on the Wiemert property or all on the adjoining property or where it is located with relation to the side lot line, there appears to be only slightly more than 8' between the side of the house and the side property line. Thus if the piazza and the roof over all were made 4' wide, there would not be 5' between the outside of either and the side property line. At least 5' of open space between the outside of the new work and the actual side property line is a requirement of the Zoning Ordinance for a dwelling house in the Limited Business Zone where the property is located.

As to the construction work, the concrete piers are to extend not only 4' below the grade of the ground but at least 6" above the grade of the ground, and the wood-work of the new piazza is to be anchored to them by means of metal dowels or otherwise.

Please bear in mind that the 4x6 sills are to set with the 6" dimension upright, are to outline both ends and the face of the platform, and that the floor joists are either to bear upon the tops of the sills or to be notched over no less than 2x2 nailing strips spiked to the side of the sills with the bottom of nailing strip flush with the bottom of the 4x6 sill.

Enc. to Contractor:  
Applicant's copy of application and  
building permit.

Very truly yours,  
Inspector of Buildings
